

CHANGELOG

gloCOM 7.2.0

bicom
SYSTEMS

wiki.bicomsystems.com

Features

- Transform standard group to shared group.
- Ability to set the group chat icon up.

Meeting Module

- Schedule a meeting from the chat.
- Store & show chat history in the Previous Meetings List.
- Avatars for external participants.
- Screen sharing notifications.
 - Screen sharing starting message - Notification on the viewer's side.
 - Participants can now see the shared screen - Notification on the presenter's side.

Contact Center Module

- Agent&Supervisor App: Integrated WhatsApp and Facebook into the list of supported communication channels.
- Agent&Supervisor App: Implemented the geolocation feature within the Agent interface.
- Agent&Supervisor App: Added Canned templates to streamline message composition.
- Agent&Supervisor App: Introduced templates for WhatsApp messages to enhance communication efficiency.
- Contacts: Implemented the Contacts Module for streamlined contact management.

Bug Fixes & Improvements

- Added support for emojis in the SMS window.
- Added the ability to download voicemail GSM files if they cannot be played.
- Added the ability to force default input/output devices on Linux to avoid softphone crashes.

- Added the ability to use the default phone mode set on the server.
- Added overlays for unsupported files and too many files when dragging onto the Chat window.
- Added the send user language code when opening OSC for localization.
- Added utf8 support when setting/storing the extension password.
- Added new EULA for 7.2.
- Fixed an issue with wrong content types in the CRM API.
- Fixed an issue with the unread conversations menu when there were too many menu items.
- Fixed an issue with the .NET installer not being found.
- Fixed an issue where the wrong user ID would be logged in chat dialogistic logs.
- Fixed the “Set away from Desktop” option for Linux.
- Fixed an issue where the app crashed on macOS when using the OpenSSL backend while fixing the certificate chain during the profile wizard.
- Fixed an issue where the app restarted after a crash.
- Fixed an issue when the session’s unread count was not cleared if another user saw the message before the current one.
- Fixed an issue with the translatable file picker filter when picking the user avatar.
- Fixed an issue with the Call Quality Indicator while On Hold.
- Fixed an issue where the recorded message was not played after the Start recording button was pressed.
- Fixed an issue where the PWproxy was not handling the busyness level properly.
- The Yealink library no longer ships with the application. Instead, it is now available to be downloaded on demand.
- Improved authentication error handling when client and server times are not in sync.
- Updated the Yealink library.
- Increased auth tokens lifetime.

- Made CRM contacts sync timeout configurable.

Meeting Module

- Changed the message Kick from audio to Remove from audio.
- Fixed an issue where the Recurring checkbox was disabled when copying a meeting.
- Fixed an issue where the Invite notification for recurring meetings did not disappear.
- Fixed an issue where Participants could not see the shared screen.
- Fixed an issue where the remote control mouse pointer incorrectly appears on the wrong screen in a multi-monitor setup.
- Improved the Outlook plugin to open a meeting window instead of an appointment when double-clicking on the calendar.
- Fixed an issue with the Outlook plugin where a meeting wasn't updated after being dragged and dropped onto the calendar.

Contact Center Module

- Agent&Supervisor App: Added informational messages regarding login changes specifically for Supervisor editions.
- Agent&Supervisor App: Resolved an issue where CC dialogs were not remaining on top of the app as intended.
- Conversations: Implemented a Total Field Counter for Active and Closed Conversations within the Conversations module.
- Conversations: Redesigned the customer information display within the Conversations tab to provide better contextual understanding.
- Conversations: Updated icons associated with the 'Channel' filter to improve the user experience.
- Dashboard: Enhanced the dashboard with various UI/UX improvements.

Bug Fixes & Improvements

- Fix issue where application doesn't start if Yealink USB SDK is missing.
- Fix issue where caller id name is missing in Voicemail dialog.
- Add option to choose if 2FA token will be removed on logout.
- Fix issue where application crashes when connecting to a server with invalid certificate during first profile creation.

Features

- Ringing Status.
- Open gloCOM Web from the gloCOM Desktop app.
- Two-Factor Authentication (2FA) on Login.
- Message Reactions.
- Re-sync the entire chat history.
- SSL certificate.
- Emergency Location - Ray Baum's act.

Meeting Module

- Clipboard Sharing.
- Configurable 'Recording reminder' option.
- Pre-Expiry meeting Notification.

Contact Center Module

- **Agent & Supervisor App**
 - Introduced a redesigned interface that seamlessly integrates all user communication channels into a user-friendly platform.
 - Currently supports LiveChat, SMS, and Email channels.
 - Key features added for the Chats and Emails section, including assigning/supervising conversations, status changes, conversation transfers, file sharing, and emojis.
 - Added Private/Whisper messages for communication between agents and supervisors.
 - Introduced Conversation history per channel for individual users.
 - The Customer profile section was added to help agents personalize interactions and provide targeted support.

- Option to Ban customers and restrict interactions with specific customers.
- **Dashboard**
 - An integrated control center for agents offering an overview of essential information about ongoing conversations.
 - Focuses on multi-channel Insights within Agents and Queue Monitoring and My Performance insights.
- **Conversations**
 - Introduced an efficient way to access ongoing and queued conversations in the system.
 - A comprehensive archive of completed conversations was introduced, too.
- **Agent Profile**
 - A reworked section providing details about the agent's state, involvement in voice and messaging queues, assigned campaigns, and the agent's current workload.
- **LiveChat Security**
 - Introduced options for banning IP addresses automatically or manually in order to prevent DDoS and other potential attacks to maintain a secure and controlled environment.

Bug Fixes & Improvements

- Increased call limit to 10 in softphone mode.
- Improved department filtering in main window.
- Added notifications badge for Microsoft Windows.
- Added option to open chat from the call history list.

Bug Fixes & Improvements

- Fixed issue where agents could not be paused if there are no pause reasons defined on the server.
- Fixed issue where Google email is changed in Preferences but old email's contacts are synced.
- Fixed issue where switching app profile does not change user logged into OSC.
- Fixed issue where currently running release is presented as an available update.
- Fixed crash when trying to send fax from an extension marked as "Do not show in desktop/mobile app" on the server.
- Improved error message in case your account has no Edition Permissions granted.
- Improved Outlook contacts sync to include contacts from subfolders.
- Improved dialog for submitting feedback from the application.
- Improved application logo.
- Improved emojis rendering.
- Mask agent pin when logging in into Agent or Supervisor edition.
- Improved dialling to preserve plus prefix in order to prevent local calls being mistaken for an international call and vice-versa.
