SYSTEMS

# gloCOM GO

A Mobile Unified Communications application designed to provide business users with a set of features and benefits capable of transforming your company's communications system into a real powerhouse. It is available on Google Android and Apple iOS.

Experience efficiency at its best with gloCOM GO Unified Communications app. Plan phone calls, control your time and define availability using the gloCOM GO Presence panel functionality integrated with PBXware.

## **Multi-Platform App**

Use gloCOM GO with your PBXware on almost any smartphone on the market.

## **Unlimited Comms**

In and out of office. Bring your PBXware functionality on a smartphone wherever you go.

## **Online Presence**

Change your availability at any time and be aware of other users' presence on the system.

## **BYOD Friendly**

Keep your PBX, Outlook, Google and Apple contacts in the intuitive gloCOM Click-to-Dial interface, all in one application.

# Unified Connections

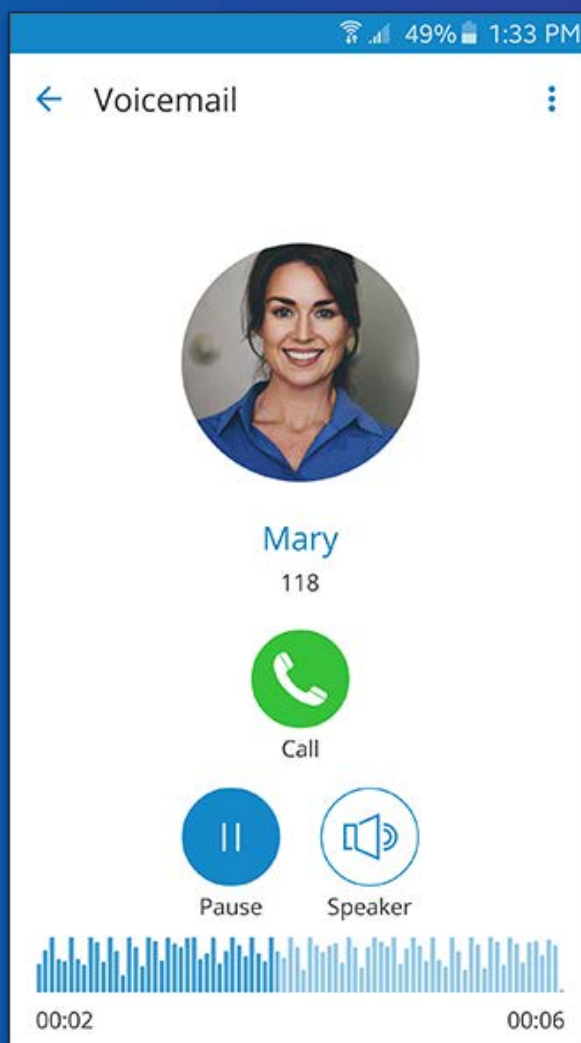

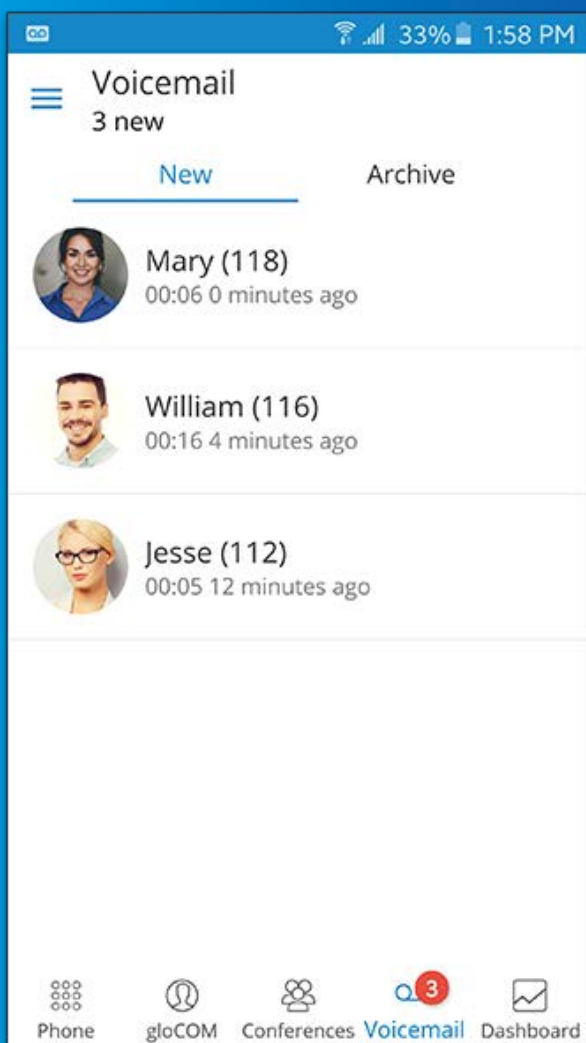

Allow you to access all of your connections, including the ones on PBXware from any device.

## Conferencing

gloCOM GO allows you to join existing static and dynamic conferences on the system, check conference participants and invite new users to the conference. Depending on the assigned conference privileges, users can also mute and kick off conference members.

## Visual Voicemail

gloCOM GO allows you to easily manage your voicemail messages from a mobile phone.

## **DID YOU KNOW?**

gloCOM GO can use callback feature to make calls via GSM. After you dial a number on your gloCOM GO, callback will be initiated and your mobile phone will be called by PBXware, once you answer the phone, call to number you dialed will be initiated.

# Unified Communications on Desktop & Mobile

gloCOM is a Unified Communications application available on Microsoft Windows, MAC OS and Ubuntu Linux designed to provide business users with a set of features and benefits capable of transforming a companies communications system into a real powerhouse.

While on the move – take your office with you and seamlessly transfer from desktop to your mobile device by using gloCOM GO our mobile application available on Google Android and Apple iOS.

# HOSTED or ON-PREMISE

At Bicom Systems, we offer both hosted and on-premise solutions for Unified Communications. When you choose the hosted deployment option, you are relieved of the burden of purchasing and maintaining the hardware. Companies that opt for the on-premise solution have the complete control over all their servers and data.
